

10-20 Size Corn Cob

U.S. Standard Screen #	Retained On U.S. Standard Screen #	Particle Size Distribution		
		Typical %	Min. %	Max. %
-	10	1	0	5
10	14	35		
14	20	54		
20	30	9		
30	40	1		
40	-	0	0	1

Bulk Density: 26 - 31 pounds per cubic foot
Moisture: Not more than 10%

1020 Grade is most commonly used in the lawn-care industry as a “carrier” for fertilizers or pesticides. The particles absorb the active ingredients of those products and serve as the “carrier.” Once the particles are dispersed or spread, they naturally biodegrade and leave the active ingredients to work on the pest population.
