T8 LED PAINT BOOTH LIGHTING

ENERGY SAVING LAMPS & FIXTURES

T8 LED Lamps are an ideal energy saving choice for shops and businesses. LED Lamps are compatible with linear light fixtures from Global Finishing Solutions® (GFS) including inside access, corner and general purpose light fixtures. When retrofitting LEDs into existing GFS equipment, it's as simple as changing out the tubes.

ENERGY SAVINGS

T8 LED Lamps offer significant energy savings — up to 40 percent* when compared to traditional fluorescent 32 watt T8 systems. Lower energy consumption allows for short payback periods, making it more cost-effective to upgrade to LED. T8 LED Lamps provide the following:

Wattage	14 watts/tube
Color Temperature	5000 K
Brightness	2100 lumens
Color Rendering Index	82 CRI

*Actual savings depend on your system configuration.

SUSTAINABLE

T8 LED Lamps emit virtually no ultraviolet or infrared light and don't contain mercury, allowing for non-hazardous waste disposal. Waste is minimized when switching to LEDs since the tubes can be installed in existing light fixtures.

LONG-LASTING PERFORMANCE

T8 LED Lamps last longer than traditional fluorescent bulbs, providing up to a 50,000 hour life span that eliminates the need to frequently replace the tubes.

ETL LISTED

Existing GFS linear light fixtures maintain their original ETL listing when switching over to LED since the LED Lamps use the existing electrical wiring. New GFS light fixtures with LED lamps are also ETL listed.

GFS Part Number: 230-286B

GLASS-FREE

You no longer have to worry about dropping and shattering your lights. T8 LED Lamps are glass-free, creating safer working conditions.

INSTANT ON

No need to wait for light fixtures to turn on — T8 LED Lamps turn on instantly at full luminosity, with no flicker or buzz.

GFS Part Number:

Four-tube fixture: LABW12-4-LED

Six-tube fixture: LABW12-6-LED
