

## AEROGREEN 4220 WOOD FLOOR CLEANER

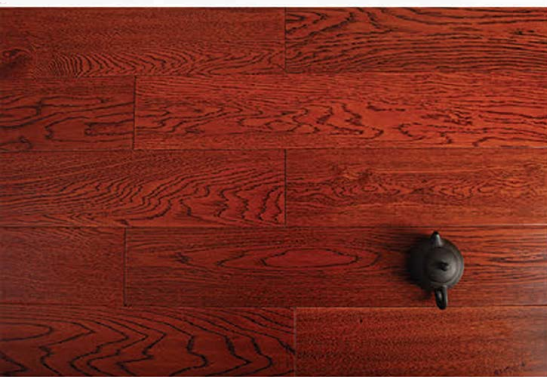

**AEROGREEN 4220 RTU (Ready to Use) Wood Floor Cleaner is a safe and effective product that provides a complete clean to your wood floors by gently and effectively removing dust, dirt and grime. AEROGREEN 4220 RTU dries fast, without leaving a dulling residue behind. AEROGREEN 4220 is ready to use, just spray and mop, no rinsing is required. AEROGREEN is safe for all hardwood, laminate, unwaxed and polyurethane finished wood floors.**

**Cleaning hardwood floors:** It is essential for protecting and maintaining their beauty. Since dirt and grime can't hide on hardwood floors like they can on carpet, cleaning your floors may seem "high maintenance;" However, once you establish your own routine, the best way to clean hardwood flooring won't seem so difficult.

**Cleaning Commercial Floors:** Improper methods and products used for daily and periodic deep cleaning are probably the main causes of damage to commercial hardwood floors. Avoid harsh chemicals (which can damage the wood or dull the finish). Also don't use dust mop treatments, oil soaps, silicone and acrylics, as they can leave a residue and adversely affect the adhesion of a coat of finish in the future.

**A few simple preventative measures to protect your floors from damage.**

**Following the correct method is easy and relatively inexpensive:**

Use protective felt pads on furniture and fixtures to prevent scratching.

Daily vacuuming or sweeping to remove dirt, sand or grit that can act like sandpaper and damage your floors.

Use **AEROGREEN 4220 RTU**, a non-toxic, low VOC waterborne formula in a ready to use form to clean your wood surfaces without leaving a film or residue behind.

**Protect your investment and keep it showroom ready with**

**DIRECTIONS DUST/SWEEP:** Giving your floors a good dusting with a microfiber mop or cloth will be your best daily defense against scratches and surface damage. Microfiber cleaning pads often use static electricity to trap dirt, particles, and other household allergens. Using a broom can be effective as well, but using a broom only pushes the dirt around. When you want to clean your floors without damaging them, avoid lifting your microfiber mop up off the floor when you clean - this way you keep the dirt trapped on the pad.

**VACUUM:** Weekly maintenance will deal with the hard to reach areas that a daily dusting can't reach. Vacuums and wet mops are ideal for getting dirt out of trouble areas like corners and the spaces between each piece of hardwood. However, using vacuums and mops come with extra caution when you want to clean floors without damaging them. If your vacuum has a beater bar, make sure it doesn't hit the bare floor. Also, take care with the wheels on the vacuum as they might damage the floor.

**MOP:**

1. Lightly spray your floor with **AEROGREEN 4220 RTU Wood Floor Cleaner**.

2. Use a mop paired with a washable, microfiber pad to mop the surface clean. A light touch is all that is needed to give it a great clean. A gentle touch is one of the best ways to clean hardwood flooring.

**POLISH:** Polishing your floor every few months is a great way to clean hardwood flooring. Polishing renews and refreshes the finish that protects your hardwood floor. With floors that have some kind of protective sealant, it is the finish that is getting the most attention when we clean - not the actual hardwood. Polishing your floor fills in microscopic scratches and evens out a floor's protective surface. Polishing a hardwood floor is not a difficult task and can be done with a minimal amount of effort.

**DEEP CLEAN:** With all the abuse we put on our hardwood floors, consider giving your floor a deep clean or a sand and refinish every 3-5 years. Sanding and refinishing your floor completely removes the old protective finish and replaces it. If your floor has some deep scratches or gouges, sanding and refinishing can repair this damage, leaving you with immaculately clean hardwood flooring.

**ADDITIONAL BENEFITS INCLUDE:**

- Leaves No Residue
- LowVOC's
- Non-Hazardous
- Non-Combustible
- No Special Hazardous Training
- Requires No Rinsing
- Can Ship by Air

**SPECIFICATIONS:**

- |                              |         |
|------------------------------|---------|
| • Biodegradability           | Yes     |
| • Flammable Combustible      | No      |
| • SCAQMD Certified           | Yes     |
| • Contains Terpenes          | No      |
| • Caustics                   | No      |
| • pH                         | 8.5-9.0 |
| • Density lbs. /per gal      | 8.9     |
| • 100% Readily Biodegradable | Yes     |
| • Ready-To-Use               | Yes     |

**SAFETY/CAUTION:**
